

PATIO/FRENCH DOORS

A sliding patio door or a traditional pair of French doors, the choice is yours!

Established in 1983, SSGE are the perfect choice when it comes to replacing or installing new sliding patio doors and French doors.

There are several options available. Sliding patio doors can be manufactured in 2,3 or 4 panels and are available up to 5 metres wide. Traditional French doors can be made with the addition of side panels to cover the same width.

We manufacture all of our frames in our own Norwich factory using the high quality REHAU profile, which is steel reinforced. All doors are glazed with toughened glass sealed units as standard making them fully compliant and achieving a very high energy rating. Colours available include white, light oak, rosewood, chartwell green, Anthracite grey and many more.

10 YEAR INSURANCE BACKED GUARANTEE

Which ever you choose we will install to our usual high standard using our own fitting teams and leave you with our 10 year insurance backed guarantee. After the work is complete, you will also receive your FENSA certificate ensuring the work has been registered and done to current building regulations.

Why not turn a window in to a new door?

SSGE have converted many homes to include an additional door opening to facilitate a new sliding patio or French door. Our fitting teams carefully remove existing frames before removing any brickwork down to floor level. The new frame is fitted and glazed. We then install a new floor window board. Plastering the new reveal finishes the job ready for painting.
